SUMMARY

Software Engineer with 2+ years of experience building production business applications across mobile, backend and data. Delivers Flutter front ends backed by Java and Spring Boot services, REST APIs and MySQL, and owns the work from database design through deployment and live support. Has worked on POS, ERP and reporting systems in multi-tenant production environments, including printer and online-ordering integrations and offline/online data synchronisation.

TECHNICAL SKILLS

Languages: Java, Dart, Python, JavaScript, SQL, C

Mobile & Frontend: Flutter, HTML, CSS

Backend & APIs: Spring Boot, REST APIs, Hibernate, Flask

Databases: MySQL, SQLite, Firebase

Tools & Cloud: Git, GitHub, Postman, AWS (basics)

Engineering: Full-stack development, API integration, database design, system integration, multi-tenant architecture, offline/online synchronisation, performance optimisation, production support, OOP, SDLC

PROFESSIONAL EXPERIENCE

Senior Flutter Developer | Incenter Solutions, Mumbai | Mar 2026 – Present

ERP software for AMC service providers, distribution networks and supply chain operations

- Own Flutter application development end to end: feature builds, application workflows, Android release builds and Play Store deployment.
- Integrate REST APIs to connect field-engineer workflows with backend services, keeping data in sync across offline and online states.
- Lead UI implementation and performance optimisation across app screens; fix production issues and provide live support.
- Translate ERP business requirements into shippable mobile features with cross-functional teams.

Software Developer | DGPOS Software Pvt. Ltd., Mumbai | Jun 2024 – Mar 2026

Restaurant POS software built with Flutter, Spring Boot and MySQL

- Built and owned a restaurant POS system end to end (Flutter, Spring Boot, MySQL) covering billing, inventory, tax and customer management.
- Worked within a multi-tenant architecture serving multiple outlets on a shared backend; developed and integrated REST APIs for real-time order and settlement synchronisation.
- **Reduced order-sync delays by approximately 40–50%** by optimising real-time synchronisation between POS terminals and backend services.
- Delivered reporting and settlement modules and thermal-printer and online-ordering integrations, from database design through deployment and production support.

Software Engineer Intern | Option's Near Me | May 2023 – Jul 2023

- Built and enhanced features for a multi-user web application using Flask, JavaScript, HTML and CSS.
- Improved frontend responsiveness and backend API performance.

PROJECTS

Restaurant Reporting System | Flutter, Spring Boot, MySQL | [View project](#)

- Built real-time reporting dashboards for revenue tracking and multi-outlet performance analytics, with advanced filters and one-click Excel export, backed by Spring Boot APIs and a MySQL database.

Pomodoro Timer Application | HTML, CSS, JavaScript, Python | [GitHub](#)

- Built a productivity app with session tracking, usage stats and configurable timer settings.

EDUCATION

B.Sc. Information Technology | KES Shroff College, Mumbai | 2024 | CGPA 9.5/10
